This bibliography is a selected listing of approximately 775 books, monographs, journal articles, collections, bibliographies, and unpublished papers on linguistics and the uncommonly taught languages. It includes 119 documents entered by the ERIC Clearinghouse for Linguistics in the ERIC system in 1967 as well as items which have appeared since the publication of the "1966 Selected Bibliography" (see ED 010 693). The entries are classified by major topics (Bibliographies, Collections, General Linguistics, Psycholinguistics, Sociolinguistics, Computational Linguistics, and Uncommonly Taught Languages), and an author index is appended. Some works on commonly taught languages are included for their theoretical significance and a few entries are also given on English for speakers of other languages and English as a standard dialect. ERIC Clearinghouse for Linguistics is a part of the Educational
Resources Information Center of the U.S. Office of Education

This bibliography has been prepared by the ERIC Clearinghouse for Linguistics expressly for the users of the ERIC system. It is available from the ERIC Document Reproduction Service, whose address is given on page v. For the acquisition number, by which it should be ordered, consult the U.S. Office of Education monthly publication Research in Education, or write to the Clearinghouse at 1717 Massachusetts Ave., N.W., Washington, D.C. 20036.

FOREWORD

This bibliography is a selected listing of approximately 775 books, monographs, journal articles, collections, bibliographies, and unpublished papers on linguistics and the uncommonly taught languages. It includes the 119 documents which were entered by this Clearinghouse in the ERIC system during 1967. The remaining entries are items which have appeared since the publication of the *1966 Selected Bibliography in Linguistics and the Uncommonly Taught Languages*.

Some works on commonly taught languages are included for their theoretical significance. A few entries are also given on English for speakers of other languages and English as a standard dialect. In general we have limited entries to items written in English, although a few documents in other languages are included for their particular value. Inevitably, some items which should have been included will have been overlooked due to the limited resources available.

About fifty pertinent periodicals are covered. Their abbreviations, as well as those for clearinghouses, etc., appear on the following page.

We have excluded items covered in specialized bibliographies developed by the Center for Applied Linguistics. Specifically, this means that users interested in English as a second language should also refer to the forthcoming *Reference List of Materials for English as a Second Language - Supplement*, prepared by the English for Speakers of Other Languages Program at CAL (to be available from the Publications Section, CAL, for $3.00 plus 30¢ handling charge). Those interested in Arabic should consult the *1960-66 Selected Bibliography of Arabic* by Theodore Prochazka, Jr. (item number 645 in this bibliography). Users interested in the uncommonly taught languages should also refer to the forthcoming *Survey of Materials in the Neglected Languages* (which emphasizes tool-of-access texts), prepared by the Foreign Language Program at CAL, which will be available from the CAL Publications Section in the spring of 1969.

We expect to publish this bibliography annually so that it can serve as an index for documents entered by this Clearinghouse in the ERIC System in any given year, and for other important linguistic literature not processed by ERIC. Purchase data for ERIC documents appears on a separate line after the entry. "MF" means *microfiche*. "HC" stands for hard copy. Ordering procedures are given on page v.

The contributions of the many members of the staff of the ERIC Clearinghouse and the Center for Applied Linguistics who helped in the preparation of this bibliography are gratefully acknowledged, in particular those of Mrs. Anna Maria Malkoc of ERIC, who not only has worked directly on the assembly of entries, but as a captive audience has made many valuable suggestions.
